

Help is on the way with the discreet press of a button

Timely help for teachers is critical to resolving both small matters and life-threatening crises. The **SAFE System™** provides the necessary information using Audio Enhancement's patented infrared classroom audio system. Issues can be contained before they escalate into major incidents.

It is simple and easy to use, for any situation:

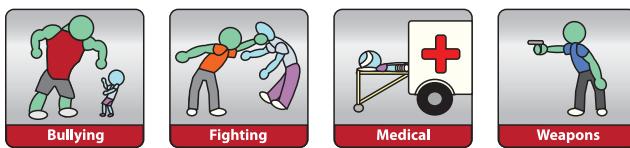

- **Press the microphone button** to silently activate the system
- **Alert is instantly sent** to first responders and live audio/video feeds are activated
- **Appropriate assistance** can be dispatched quickly with clear and concise information

Audio Enhancement has been improving learning environments for over 30 years. When educators expressed the need to be able to summon assistance quickly, the SAFE System was born.

Now students and teachers can have a classroom that is not only the best place for instruction, but a secure location with the ability to alert the right people at the right time.

The combination of Audio Enhancement and the SAFE System allows Superintendents to realize their objectives of ensuring academic achievement and student safety.

Schools of all sizes across the country are successfully using the SAFE System for the security of their teachers and students, as well as reducing liability concerns. Options are provided for prevention, mitigation and incident resolution.

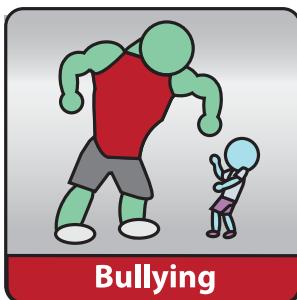

The SAFE System™: Practical to use for everyday situations, essential in extreme emergencies

The ability to provide security options for all those within the walls of a school is critical today. The SAFE System can help you handle just about any issue that occurs.

From minor incidents to major conflicts, the SAFE System can be key. It gives the school the means to defuse and handle problems before they become liabilities.

Law enforcement and school security officers depend on SAFE System's alerts and information. Parents are reassured just knowing the System is installed in their school.

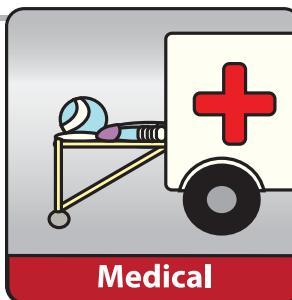

"In today's world, having a reliable emergency alert system is not a luxury, it is a necessity."

Bullying

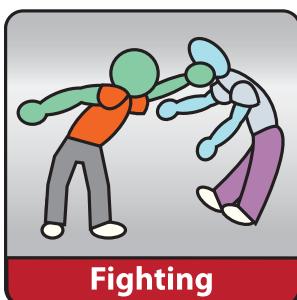

Students bullying and harrassing others is a long-standing problem that has been receiving national focus and attention. With the capabilities of the SAFE System, teachers and

administrators are able to monitor, intervene and correct such behavior before it leads to tragic circumstances.

Medical

Regardless of the severity of the health emergency, all medical incidents need immediate and appropriate response. From head or heart conditions to allergic reactions or broken bones, sports injuries to chemical exposures, the SAFE System provides a way to get the proper help quickly.

Fighting

As pushing, shoving and name-calling occurs, it can often escalate into violent situations that affect more than the perpetrators and victims. The SAFE System gives school personnel the

advantage and the ability to step in before things get out of control and students get seriously hurt.

Weapons

While many think "it can never happen here," armed students or intruders have shown up everywhere. Informing staff with the SAFE System's instant live audio and video feed, as well as summoning authorities, could be the best answer to handling violent intruders.

Every classroom should be SAFE

Recognizing the benefits of the SAFE System, many resourceful schools have found various methods for funding their equipment: *School Improvement Grants*, *Homeland Security Grants*, and *Title I Funds* are just a few of the options.

Every teacher and student deserves a secure school that is prepared for anything. It is possible with the SAFE System which can help with preparation, mitigation and liability. Questions? Contact Audio Enhancement today.

SAFE SYSTEM™
Security Alert For Education

by **AUDIO ENHANCEMENT®**

The SAFE System (patent pending) is an alert notification system not intended to prevent emergencies. Audio Enhancement, our agents, employees, subsidiaries, affiliates and parent companies are exempt from liability for any loss, damage, injury or other consequence arising directly or indirectly from the application of our equipment. In the event of misuse or malfunction of the SAFE system or any of its components, Audio Enhancement, our agents, employees, subsidiaries, affiliates and parent companies are exempt from liability for any loss, damage, injury or other consequence arising directly or indirectly therefrom.

Instantly Answer a Request for Help

The **SAFE System™** works quickly to reach the appropriate people in the event of an emergency. All components have been created to work together seamlessly to provide peace of mind when emergencies arise:

- ① **Teacher Teardrop Microphone:** *Transmits* a silent alert signal wirelessly to the sensor mounted on the ceiling. Simply press and hold the discreet alert button to activate the system.
- ② **IR-Satellite Dome Sensor/Receiver:** *Receives* and transmits the alert signal. LED lights display green or red to indicate that the message has been sent and when it has been acknowledged.
- ③ **MS-200 Network Interface Module:** *Activates* audio (and/or video) recordings immediately with the optional VIEWPath Classroom software. Microphone Usage Assessment software is included.
- ④ **MS-1000 Monitoring Station** (located in the administrator's or front office): *Sounds* an alert. Strobe lights flash and critical location information is displayed in its message window.
- ⑤ **Alert Emails:** *Sent* to computers, phones or tablets of designated personnel. Live classroom audio and video becomes available instantly.

With the SAFE System, response can be immediate and those first on the scene will have the information critical to resolving the situation. Schools across the nation use the SAFE System to protect their teachers, faculty, and students.

OPTIONAL ACCESSORIES

The wall-mounted **Alert Notification Button** is ideal for hallways, board rooms, etc.

The **MS-101 Network Interface** provides basic alert messaging and live audio stream.

Adding video capabilities is easy as installing these cameras. The **SAFE System™** integrates easily with many types of cameras.
